

Vanished Ocean: How Tethys Ocean Reshaped the World (Dorrik Stow)

Sample Index

Figures (illustrations, maps, and charts) are indicated by the letter f after the page number.

- absolute dating methods 19–21
- Aden, Gulf of 272
- Africa
 - Atlas Mountains 31, 35–41, 89–90, 99, 236–238, 237f
 - closure of Mediterranean 236–238, 237f, 262–264, 271
 - East African Rift Valley 54, 272–273, 274
 - partial submergence of 138–139, 165; maps 114f, 138f, 163f, 188f, 201f
 - predictions for 266f, 271, 272–273, 274
- algae 71
- Allegheny Mountains (USA) 31
- ammonites
 - extinctions 87–88, 173f
 - Jurassic 83, 97f, 98, 101f, 106, 176f
 - Permian 71
- anaerobic bacteria 125
- Andalucia (Spain) 9
- Anning, Mary 100–103
- Antarctica
 - positions of 30, 163f, 165, 188f, 200, 201f
 - predictions for 266f, 273
- apes 258–259
- Appalachian Mountains (USA) 31
- archosaurs 18
- Arizona (USA) 87
- asteroid extinction theory 176–185
- astronomical cycles 18, 157–158
- Atlantic Ocean
 - development of 114f, 138f, 148, 188f, 199, 201f
 - mid-Atlantic ridge 142–143, 145–147
 - predictions for 266f, 273, 274
 - submarine waterfalls 204–205
- Atlas Mountains (Africa) 31, 35–41, 89–90, 99, 236–238, 237f
- Australia
 - glaciation in 29–30
 - positions of 163f, 165–166, 188f, 200, 201f
 - predictions for 271
- Azores (Atlantic Ocean) 146–147
- Bangladesh 239
- belemnites 97f, 98, 101f
- Bengal Fan (Indian Ocean) 239–241
- biodiversity 75, 93–94
- birds 60, 97f, 110–112, 170
- bivalves
 - Cambrian 62
 - Cretaceous 169, 170, 173f
 - extinctions 87, 173f
 - Jurassic 81, 96, 101f
 - Permian 44, 66
 - rudists 96, 106, 156, 170, 173f
 - survival of extinctions 74, 81, 189
 - Triassic 83, 87
- black shale episodes 105, 114–117, 119, 120, 130–131
- black smokers 232–236, 234f
- blastozoans 71
- bolide extinction theory 176–185
- bottom currents 203–207
- brachiopods (lamp shells)
 - extinctions 73, 172, 173f
 - Permian 33, 44–45, 57, 61, 66, 69f, 71
- Brazil 45–50
- bryozoans
 - extinctions 73, 189
 - Jurassic 96, 97f
 - Permian 45, 66, 69f, 71
- Bryson, Bill 140
- calpionellids 156
- Cambrian period 62–64, 63f
- Canada 41
 - see also* North America
- carbon dating 19–21
- carbon dioxide 268, 269–270
- Carboneras (Spain) 251–253, 259–261
- Carboniferous period 68, 70
- Caribbean Ocean 91
- Cenozoic Era
 - the earth during 188–189, 188f, 198–203, 201f, 206–207, 236–238
 - life during 189–198, 196f, 207–214, 254–259
 - mountain building during 222–224, 223f, 227–228, 236–238
 - see also* Eocene Epoch; Miocene Epoch
- Central Pangaeian Mountains 31–32, 35–38
- chalk 153–158, 155f, 157f
- clams 96
- climate
 - astronomical cycles and 18
 - cool periods 256, 262
 - extinctions, role in 75–76, 77–78
 - global warming 75, 76, 78, 129–130, 268, 269–270
 - ice ages 29–30, 127–128, 221–222, 267
 - ocean circulation and 127–128, 205–206, 267–270
 - plate tectonics and 75–76, 92–93, 238, 267
 - predictions for 273–274
 - warm periods 45, 129–130, 206, 267
- coal, formation of 67–68
- coccoliths
 - Cretaceous 154, 155f, 156, 164, 173f, 175, 176
 - description 122
 - extinctions 164, 173f, 175, 176, 189
 - Jurassic 96
- conodonts 33–34, 57
- continental shelves 75, 92
- continents, movement of
 - formation of Pangaea 27–32, 75
 - breakup of Pangaea 52–54, 88–94, 139–140
 - movements to current positions 90–91, 165–166, 199–203
 - predictions for 266f, 270–274
 - see also* maps of world; *specific continents*
- convergent plate boundaries 8f, 9
- coral reefs 10, 81, 97f, 107, 171–172, 253
- corals 62, 96, 97f, 101f, 173f
- Coriolis force 56

- crabs 96, 97f, 169, 189
 cratons 26–27
 Cretaceous period
 black shale episodes 105, 114–117, 119, 120, 130–131
 chalk from 153–158, 155f, 157f
 climate 128–129
 high sea levels 138–139, 138f, 139f, 148–149, 153–156
 life during 154–157, 155f, 160–161, 166–170, 172–175, 173f
 maps 114f, 138f, 163f
 oil from 133–136
 plate tectonics 114f, 138–139, 138f, 163f, 165–166, 222
 see also KT extinction event
 crinoids (sea lilies)
 Cambrian 62
 extinctions 73, 87
 Jurassic 97f
 Permian 45, 66, 69f, 71, 72f, 73
 Triassic 57, 87
 crocodiles 160
 cyanobacteria 122
 cynodonts 48–49
 Cyprus 231–232
- day, changes in length of 11
 Deccan Traps (India) 179, 222, 241
 deep-sea canyons 244–246, 245f
 deep-water currents 203–207
 desert dollars (nummulites) 191–192
 deserts 41, 42–43, 43f, 45, 47–49
 diatoms 96, 121–122, 123f, 156, 173f, 175, 189
 dinoflagellates 96, 122, 171, 173f, 189
 dinosaurs
 evolution 48, 80, 85–86, 102, 111
 extinctions 163–164, 166, 173f (*see also* KT extinction event)
 fossils of 102, 103–104
 divergent plate boundaries 8, 8f
- earthquake belts 6–7, 143
 East African Rift Valley 54, 272–273, 274
 echinoderms 62
 echinoids (sea urchins) 87, 101f, 189
 Egypt 191–195, 196f
 El Capitan Reef (USA) 71
El Gordo (Spain) 13–14
 England, Jurassic rocks in 99–107
 Eocene Epoch
 the earth during 188f, 192–193, 199–203, 201f
 extinctions 256
 life during 196–198
 see also Cenozoic Era
 erosion 31–32, 40–41, 238–241, 244–246
 Europe
 closure of Mediterranean 236–238, 237f, 262–264, 271
 mountains in 95, 99, 236–238, 237f
 partial submergence of 114f, 138, 163f, 165, 188f, 201f, 216f
 see also England; Germany; Italy; Spain
 evaporates 90–91, 260–264
- evolution
 birds 110–112, 170
 insects 70, 110–111
 mammals 48–49, 80, 169, 194–198, 196f, 255, 257–259
 marine life: Cambrian explosion 62–64; Jurassic 81–83, 96–98; recovery from KT extinction 189–190, 194–198; Miocene 208–211
 overview of 59–65, 63f, 80–83
 plants 68–70, 86–87, 167–168, 256
 reptiles 48, 50, 51f, 80, 83, 85–86, 102, 111
 extinctions
 climate, role of 75–76, 77–78
 Eocene extinction event 256
 explanation of 58–61, 63f, 64
 mammals 163
 marine life 72–75, 87–88, 164, 171–176, 173f, 189
 modern day 77–78
 Permian extinction event 48, 58, 63f, 64, 72–77, 151
 plants 74, 87
 plate tectonics, links to 74–75, 91–94, 166
 reptiles 88, 163–164, 166, 172–174, 173f, 175–176
 Triassic extinction event 87–88
 volcanic activity and 75–76, 179–180, 184–185
 see also KT extinction event
 extremophiles 232–235, 234f
- faults 221, 252–253
 faunal succession, law of 94
 fish
 Cenozoic 208–210, 208f, 212
 Jurassic 81
 Permian 71, 74
 survival of extinctions 74, 81, 189, 208
 flight, evolution of 70, 110–112
 flint 157–158
 food chain 95–96, 124–125, 257
 foraminiferans
 Cenozoic 191–192
 Cretaceous 156, 176
 explanation of 123, 123f
 extinctions 74, 173f, 175, 176, 189
 Jurassic 96
 Permian 67, 74
 forests 68, 70, 74, 167–168, 256
 fossils
 birds 110
 fish 208f, 210
 geological dating and 9–11, 18–21, 94–95
 insects 255
 mammals and their ancestors 48–49, 194–198, 196f, 255
 marine fossils 33–34, 160–161, 174, 191–192, 196f, 208–209; photos and diagrams 69f, 72f, 73f, 97f, 123f, 155f, 176f, 208f; reefs 9–10, 71
 plants 86–87
 plate tectonics, and discovery of 28, 70–71
 reptiles 48, 50, 51f, 85–86, 102, 102f, 103–104, 111, 255
 trace fossils 104–105
 fusulinids 33, 67
- Ganges River 239
 gas (natural) 131–132
 gastropods 62, 87, 169, 172, 173f
 geological dating 9–11, 16–21, 94–95, 129–130

- geological time 20f
Germany 254–255
Gibraltar, Straits of 6, 199, 201f, 207, 263–264
glaciation 29–30, 152–153
global warming 75, 76, 78, 129–130, 268, 269–270
Gondwana continent 24f, 28–31, 68, 74, 80f, 90
granites 36–37, 225
graptolites 63, 73
Great Pangaeen Orogeny 31–32, 35–38
Great Parana Basin (Brazil) 45–50
Greek goddess Tethys 2
greenhouse gases 268, 269–270
Greenland 74, 200
Gubbio (Italy) 177, 181
Gulf of Mexico 90–91, 135
gypsum 260–261, 263
- herbivores 87, 256–257
Hess, Harry 142
Himalayan Mountains 216–219, 222–224, 223f, 227–228, 229f, 238–241, 271
hotspots 52–54, 148, 200
Humboldt, Alexander von 95
hydrocarbons 132–133
see also oil
hydrothermal vents 232–236, 234f
- ice ages 29–30, 127–128, 221–222, 267
icecaps 29–30, 152–153
Iceland 146
impact craters 178
India
Deccan Traps 179, 222, 241
positions of 163f, 165, 188f, 221–224, 223f
Indian Ocean 138f, 148, 222, 239–241
Indonesia 225
insects 70, 110–111, 255
iridium 177, 179–180
islands, formation of 225
Italy 37–38, 120, 177, 181, 208
- jellyfish 71, 97f
Jura Mountains (Europe) 95, 99
Jurassic period 80–112
life during 80–88, 95–98, 97f, 101–102, 101f, 110–112
oil from 135
plate tectonics 80f, 88–94
reefs from 107–110
rocks, examples of 99–107
- Korea 84–86
KT extinction event (end of Cretaceous) 163–188
environment during 165–166, 185–186
evolution during 167–172, 174–175
extinctions during 63f, 163–164, 166, 172, 173f, 175–176
recovery from 189–190, 194–198
theories about 64, 164, 176–186
Kuhn, Thomas 25
- lamp shells *see* brachiopods
Laurasia continent 24f, 30–31, 68, 74, 80f, 90
lithosphere 7, 8f
lobsters 83, 96–97
- magnetic field reversals 19, 144–145
mammals
evolution 48–49, 80, 169, 194–198, 196f, 255, 257–259
extinctions 163
fossils of 48–49, 194–198, 196f, 255
see also specific species
mantle 7–8, 8f, 52
mantle plumes 52–54, 148, 200
maps of world
at peak of Tethys Ocean 24f, 56f, 80f
as Tethys Ocean disappeared 114f, 138f, 163f, 188f, 216f
present day 243f
predicted 266f
Matthews, Drummond 140–141
Mediterranean Sea, closure of 236–238, 237f, 262–264, 271
mesosaurs 50, 51f
Mesozoic Era *see* Jurassic period; Triassic period
Messel Pit (Germany) 254–255
metal ores, origin of 235–236
metamorphic rocks 226
mid-ocean islands 145–147
mid-ocean ridges 8–9, 8f, 142–147, 232–236
Milankovitch cycles 18, 157–158
Miocene Epoch 201f, 208–211, 216f, 250–253, 260f, 261–264
see also Cenozoic Era
month, changes in length of 11
Morley, Lawrence 140
Morocco 34–37

- rudist reefs 156, 170–172
- salt deposits 90–91, 261, 263
- San Andreas Fault (USA) 9
- sand dollars 189
- sandstones 38–43, 84–86
- sea-floor spreading
 in Atlantic Ocean 142–143, 146–147
 explanation 8–9, 8f, 142–145, 224–227
 in Indian Ocean 222
 in Pangaea 90
 predictions for 272–273
 sea levels, effects on 92, 138, 151–152, 222
see also plate tectonics; rift valleys
- sea grasses 168–169
- sea levels
 falls in 185, 238, 262; lowest point (Permian extinction) 75, 151
 graph of 139f
 ice caps, effects of 152
 rises in 83, 130, 267, 269; highest point (Cretaceous) 138–139, 138f, 139f, 148–149, 153–156
 sea-floor spreading, effects of 92, 138, 151–152, 222
- sea lilies *see* crinoids
- sea snails 74, 81, 83, 169–170, 189

- sea urchins (echinoids) 87, 101f, 189
 seas *see* oceans; Pangaea supercontinent: seas within
 sediment depositions
 from bottom currents 205–206
 chalk 153–158, 155f, 157f
 from eroding mountains 31–32, 40–41, 238–241,
 244–246, 245f, 248–250
 from evaporation 261, 263
 red bed sandstones 38–43, 84–86
 Tethys Ocean and 104–107, 153–158, 155f, 157f,
 181, 238–241, 260–264
 sedimentary rocks *see* chalk; sandstones
 seed ferns 70–71
 shales *see* black shale episodes
 sharks 58, 71, 74, 81, 210–211
 Sheehan, Kevan 103–104
 shellfish 61, 66, 96
 shrimp 71, 83
 Siberian Traps 75–76
 silicoflagellates 156
 skeletons, development of 62, 63–64
 Smith, William 94
 snails 98
 soil, first appearance of 69–70
 South America
 Great Parana Basin 45–50
 predictions for 266f, 273
 separation from Africa 114f, 138f, 148, 163f, 188f,
 201f
 separation from North America 80f, 90–91
 Spain 9, 11–16, 251–253, 259–261, 260–264
 sponge reefs 80, 81, 97f, 108–110
 sponges 45, 69f, 71
 stratigraphic timescale 20f, 21
 stromatolites 69f, 122
 subduction zones 224–227
 submarine deltas 239–241
 submarine waterfalls 204–205
 supercontinents 266f, 271–272, 273
 see also Gondwana; Laurasia; Pangaea
 superposition, law of 17
 Syria 158–161
- Tabernas Basin (Spain) 11–16
 Tethys Ocean
 development and growth 24, 33, 88–89, 138–140,
 141
 disappearance 188, 199, 227–228, 262–264
 existence of 4, 20f
 maps (*see* maps of world)
 ocean currents 56–57, 56f, 80f, 129, 206–207, 267
 oil, sources of 133–135
 reefs in 80, 81, 108–110
 sediment depositions 104–107, 153–158, 155f,
 157f, 181, 238–241, 260–264 (*see also* red
 bed sandstones)
- Tibet 223
 trace fossils 104–105
 transform plate boundaries 8f, 9
 Triassic period 56f, 57–58, 80–83, 82–91
 trilobites 57, 63, 66, 69f, 73, 73f
 tsunamis 14
 Tunisia 244–246, 248–250
 turbidites 14, 245f, 246, 248–250
 turbidity currents 240–241, 245–247, 245f
 turtles 160–161, 169, 213–214
- ultrabasic rocks 15–16
 uniformitarianism 10
 United States *see* North America
 upwellings 126f, 128, 203
 Ural Mountains 32, 65–66, 75–76
- Valley of Whales (Egypt) 194–195, 196f
 Vine, Fred 140
 volcanic activity
 extinctions and 75–76, 179–180, 184–185
 at mid-ocean ridges 143, 146–147
 at subduction zones 225–226
 at volcano belts 6–7, 143, 253
- Wegener, Alfred 24–25, 26, 27, 71
 whales 194–195, 196–198, 196f, 213
 World Heritage Jurassic Coast 99–107
- year, changes in length of 11
- Zechstein Sea 44–45, 45f
 zircon grains 248–250
 zooplankton 82–83, 123–124, 123–125, 123f, 156
see also specific species
